

MADHU SUDHAN PAINOORI

Senior Director, Quality Engineering | AI Platforms Serving Product · Engineering · QA · SRE · Support

Hyderabad, India • +91 80086 90004 • p.mschary@gmail.com • LinkedIn: linkedin.com/in/madhu-sudhan-painoori

EXECUTIVE SUMMARY

Senior Director with 20+ years architecting and scaling Quality Engineering across SaaS, product, and enterprise platforms. Currently lead Quality Engineering at AutoRabit (10 direct reports with 100+ indirect / matrix scope across Product, Engineering, QA, SRE, and Support) — driving end-to-end quality strategy for a multi-product DevSecOps suite (Release Management, CodeScan, Vault, DataOps). Drove organization-wide adoption of AI / GenAI (Copilot, ChatGPT, Claude, Amazon Bedrock, AWS Kiro, Cursor, KaneAI, Mabl, TestAI) and AI agents that automate ~95% of manual tedious effort — lifting velocity, improving engineering ROI, and reducing customer escalations by ~70%. Architect of in-house cross-functional platforms — RabbitView (engineering intelligence: DORA, velocity, backlog, releases, team analytics), Report Portal, AI-enabled TMS (Bedrock-powered), Telemetry, Skill Matrix — built on TypeScript / Python / Docker / PostgreSQL / Redis. Prior leadership at Oracle, CoMakelT, NetEnrich, and Zeta Interactive across SaaS, EdTech, gaming, and enterprise content management.

CORE COMPETENCIES

- | | | |
|--------------------------------|--------------------------------|---------------------------------|
| ▶ AI Platforms for Engineering | ▶ Cross-Functional Leadership | ▶ Engineering Effectiveness |
| ▶ Quality Engineering Strategy | ▶ Agentic AI Architecture | ▶ DORA & Velocity Metrics |
| ▶ GenAI for Test Automation | ▶ Scalable Test Architecture | ▶ Release & Risk Management |
| ▶ SaaS Product Quality | ▶ CI/CD & DevOps Integration | ▶ Internal Platform Engineering |
| ▶ Performance Engineering | ▶ Security Testing & DevSecOps | ▶ APM & Production Monitoring |
| ▶ Agile / Scrum Delivery | ▶ Mentoring & Team Building | ▶ ROI & Velocity Optimization |

PROFESSIONAL EXPERIENCE

SENIOR DIRECTOR – QUALITY ENGINEERING | AutoRabit Pvt Ltd

May 2021 – Present

Cross-functional leadership across Product · Engineering · QA · SRE · Support at AutoRabit's DevSecOps SaaS platform for Salesforce (Release Management, CodeScan, Vault, DataOps).

- **Lead a 10-person QA organization with 100+ indirect / matrix scope across Product, Engineering, QA, SRE, and Support;** define enterprise QA strategy across four product lines (Release Management, CodeScan, Vault, DataOps), embed quality gates into the SDLC, and align testing roadmaps with product and engineering leadership.
- **Built RabbitView — the in-house engineering intelligence platform serving Product, Engineering, and QA:** DORA metrics, individual and team velocity, product backlog tracking, release monitoring, and team analytics — a single pane of glass replacing spreadsheet- and Slack-based status across the organization.
- **Drove organization-wide adoption of AI and GenAI across cross-functional teams — Copilot, ChatGPT, Claude, Amazon Bedrock, AWS Kiro, Cursor, KaneAI, Mabl, TestAI** — automating ~95% of manual tedious effort via AI agents, lifting velocity, improving engineering ROI, and accelerating customer-focused deliverables.
- **Architected an Agentic AI Platform on AWS Kiro (specs / skills / steering / MCPs):** Jira story → agent develops story → impact analysis → AI-generated tests → Playwright + MCP + Amazon Bedrock for analysis and self-healing → validated release. Includes a PR Quality & Coverage Agent on every PR lifting unit-test coverage and code quality across engineering.
- **Shipped in-house platforms on TypeScript / Python / Docker / PostgreSQL / Redis:** RabbitView, Report Portal, AI-enabled TMS (Bedrock-powered duplicate / invalid-test detection), Telemetry, Skill Matrix, Performance Optimizing Agent, AutoScreen (recruitment automation) — each removing a recurring cost from the broader engineering org.
- **Delivered measurable business outcomes:** drove ~70% reduction in customer escalations and reduced churn tied to quality and deliverables — while building and mentoring the QA organization, raising release quality, and developing the next generation of QA leaders.

QUALITY ASSURANCE MANAGER (Principal QA Engineer) | CoMakelT Pvt Ltd

Sep 2017 – May 2021

Built and led the QA function for Iddink (Netherlands), a cloud-based EdTech platform digitizing schools across the Netherlands.

- **Established and led a 10-member QA team** as both QA Manager and Scrum Master — owning resource planning, sprint execution, and quality KPIs across distributed onshore/offshore delivery.
- **Drove fast-track product releases** by orchestrating cross-functional collaboration between development, DBA, middleware, and release teams on a tight Agile cadence.
- **Led performance engineering** using Neoload and JMeter — designing load, stress, and scalability test programs to validate the platform under nationwide academic-year peak load.
- **Owned release management end-to-end and security validation:** patch test planning, production migration playbooks, critical-issue response, plus OWASP-aligned vulnerability scanning, XSS and SQL Injection testing for the public-facing EdTech web application — improving release predictability and security posture.

SENIOR MEMBER TECHNICAL (QA Lead) | Oracle India Private Limited

Mar 2012 – Sep 2017

QA leadership across Oracle WebCenter Sites, Sites Cloud Service, and Documents Cloud Service product lines.

- **Led a 5-member QA team** across Oracle's WebCenter content management and cloud services portfolio, owning sprint planning, work allocation, and quality compliance.
- **Built and maintained the QA Lab infrastructure** — a production-equivalent multi-stack environment (Oracle / MSSQL / DB2 / MySQL on WebLogic / WebSphere / JBoss / Tomcat across Solaris, RHEL, and Windows) used to certify every product release.
- **Owned performance engineering and profiling** for Oracle WebCenter Sites using Neoload, LoadRunner, and JProfiler — identifying and resolving JVM, query, and infrastructure bottlenecks across functional, regression, integration, accessibility, and API/web services testing pre-release.
- **Embedded security testing and DevOps automation into Oracle's secure-release process:** Acunetix and Burp Suite for vulnerability scanning and ethical hacking; Jenkins, Chef, and Puppet to automate QA-lab environment provisioning and accelerate test cycle setup.

SENIOR DATABASE ADMINISTRATOR (MySQL) | NetEnrich Private Limited

Jan 2011 – Mar 2012

Production DBA for Disney/Playdom social gaming platform and GoldLine market data application.

- **Led production DBA support (backups, disaster recovery, configuration tuning, 24x7 query performance) for the Disney Playdom Facebook gaming portfolio** — tuning MySQL schemas, queries, configurations, and APIs to sustain Facebook-scale gaming traffic on Linux.

TECHNICAL LEAD — Performance, DBA & Security | Zeta Interactive Private Limited

Oct 2007 – Sep 2010

Technical lead for a portfolio of email marketing, digital publishing, and analytics products.

- **Certified Zeta Mail (Flash) for 1,000 concurrent users at <5-second response times** using Neoload — establishing the SLA benchmark for the product line.
- **Benchmarked Zeta Next Pages (digital catalogue) for 10,000 concurrent users** and tuned the Flash front-end and back-end to meet SLA response times under peak load.
- **Migrated production MySQL databases (32-bit 5.0 → 64-bit 5.1; MySQL → Oracle via CrossDB) with zero data loss;** profiled and tuned Java code (JProfiler) and DB queries across Ebiz Mailer, Zeta Lite, and Zeta Search — eliminating recurring production performance defects and leading RCA on critical incidents.

TECHNICAL SKILL ARSENAL

Test Automation	Selenium WebDriver, TestNG, Playwright (with MCP & AI for NLP automation and self-healing), Apache Maven, Protractor (TypeScript), TestAI, Test Allure (TestOps), API/Web Services automation
AI & GenAI	Copilot, ChatGPT, Claude, Amazon Bedrock, AWS Kiro, Cursor, KaneAI, Mabl, TestAI; LLM-assisted test design, AI agents for QA automation, intelligent test analytics, AI-driven failure analysis
Performance Engineering	Neoload, JMeter, LoadRunner, JProfiler, Lambda Probe; load, stress, scalability, soak, and benchmark testing
APM & Monitoring	Datadog, Dynatrace, Prometheus, Grafana, Amazon CloudWatch, JConsole, VisualVM, MySQL Enterprise Monitor
Security Testing	Acunetix Web Vulnerability Scanner, Burp Suite, Web Load; OWASP, XSS, SQL Injection, ethical hacking
DevOps & Methodologies	Jenkins, Bamboo, Chef, Puppet, Docker, Bitbucket, SVN; Agile/Scrum (PSM-1), Waterfall, SDLC, CI/CD, DevSecOps, Microservices testing
Databases, Servers & Cloud	Oracle, MSSQL, DB2, MySQL, PostgreSQL, Redis; WebLogic, WebSphere, JBoss, Tomcat, Apache, IIS; Oracle Documents Cloud, AWS CloudWatch; Linux, Solaris, Windows
